Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	2 Marks

Customer Problem Statement Template:

This document defines the primary user pain points and operational challenges regarding metro station ticket purchasing, focusing on transitioning from physical queues to a digital self-service ServiceNow solution.

Problem Statement (PS)	I am... (Customer)	I'm trying to...	But...	Because...	Which makes me feel...
PS-1	A daily metro commuter	Purchase a metro ticket/pass quickly during morning peak hours	I have to wait in long physical queues at the ticket counter	The station relies on manual counter sales without a digital self-service option	Frustrated and delayed, leading to missed trains and lost time.
PS-2	A Metro Station Authority / Administrator	Keep track of daily ticket issuances and ensure smooth gate access	Paper tokens and manual receipts are hard to track and easily lost	There is no centralized automated system to log bookings and generate digital entry codes	Overwhelmed by crowding at gates and unable to monitor real-time passenger flow.
