Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

1. What does he/she SAY?

- "I hate standing in long ticket counter lines every morning during peak hours."
- "Why can't I just buy a ticket or pass on my phone or computer before arriving at the station?"
- "I lost my physical token yesterday and had to pay a fine."

2. What does he/she THINK?

- "There must be a faster, digital way to get my station pass."
- "If I miss this train while waiting in line, I'll be late for work/class."
- "A digital QR code on my phone would be so much easier to scan at the gate."

3. What does he/she DO?

- Leaves home early to account for long queuing times at the ticket counter.
- Constantly checks the train schedule on their phone while waiting in line.
- Looks for self-service options or digital booking channels before traveling.

4. What does he/she FEEL?

- Anxious & Stressed: Concerned about delays and missing the train due to long lines.
- Frustrated: Annoyed by outdated manual ticketing systems and lack of self-service options.
- Relieved (when using ServiceNow): Confident when able to generate a ticket and QR code online instantly.

Pains & Gains

Pains (Challenges & Obstacles)

- Time wasted standing in physical queues during rush hours.
- Risk of misplacing physical paper tickets or tokens.
- Lack of immediate confirmation or digital receipts for travel expenses.

Gains (Benefits & Desired Outcomes)

- **Instant Ticketing:** Generate tickets in seconds via ServiceNow Service Catalog.
- **Contactless Gate Entry:** Quick entry using dynamically rendered QR codes.
- **Centralized Tracking:** Easy access to past ticket bookings and active travel passes.
