

Project Design Phase
Proposed Solution Template

Date	02 August 2026
Team ID	
Project Name	Metro Ticket Booking In Servicenow
Maximum Marks	2 Marks

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Metro passengers face long queues at ticket counters, manual ticket booking delays, paper ticket loss, and limited digital ticket management.
2.	Idea / Solution description	Develop a ServiceNow-based Metro Ticket Booking System where users can book tickets online through the Service Catalog, select source and destination stations, choose passenger type and ticket quantity, automatically calculate fare, and generate a QR-code-based digital ticket.
3.	Novelty / Uniqueness	The system combines ServiceNow Service Catalog, Flow Designer automation, automatic fare calculation, QR code generation, and centralized booking history into a single digital metro ticketing solution.
4.	Social Impact / Customer Satisfaction	Reduces waiting time, enables contactless ticket booking, minimizes paper usage, improves passenger convenience, and provides faster ticket verification at metro gates.
5.	Business Model (Revenue Model)	Revenue is generated through metro ticket sales. Additional opportunities include digital service charges, premium passes, smart card integration, and partnerships with metro authorities.
6.	Scalability of the Solution	The solution can be expanded to multiple metro cities, integrated with online payment gateways, mobile applications, smart cards, real-time train schedules, and advanced analytics for passenger management.
