

User Acceptance Testing (UAT) Template

Date	02 August 2026
Team ID	
Project Name	Metro Ticket Booking in servicenow
Maximum Marks	

Project Overview

Project Name:

Metro Ticket Booking with QR Code Generation

Project Description:

A ServiceNow-based application that allows users to book metro tickets online, automatically calculate fares, generate QR-code-based digital tickets, and maintain booking history.

Project Version:

Version 1.0

Testing Period:

31 July 2026 – 02 August 2026

Testing Scope

Features Tested

- Metro Station Selection
- Ticket Booking
- Fare Calculation
- Passenger Type Selection
- QR Code Generation
- Booking Record Creation
- Flow Automation
- Booking Status Update

User Stories Tested

- User can select Source and Destination stations.
- User can enter passenger details.
- User can calculate fare automatically.
- User can successfully book metro tickets.
- User receives QR-code-based digital ticket.

Testing Environment

Application

ServiceNow (Australia Release)

Location

Service Catalog → Book A Metro Ticket

Credentials

System Administrator

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
TC-001	Station Selection	Select Source & Destination Stations	Stations should be selected successfully	Working as Expected	Pass
TC-002	Fare Calculation	Select Passenger Type and Ticket Count	Total Fare calculated automatically	Working as Expected	Pass
TC-003	Ticket Booking	Fill all details and submit form	Booking record created	Working as Expected	Pass
TC-004	Booking Record	Verify Metro Ticket Booking table	Booking details stored correctly	Working as Expected	Pass
TC-005	QR Code Generation	Submit booking	QR Code generated successfully	Working as Expected	Pass
TC-006	Input Validation	Enter invalid ticket quantity	Validation message displayed	Working as Expected	Pass
TC-007	Flow Automation	Submit Catalog Item	Booking Status updated automatically	Working as Expected	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Station name displayed as Sys ID	Open Station Lookup	Medium	Closed	Display field configured successfully
BG-	Flow not visible in	Attach Flow in	High	In	Service Catalog Flow

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
002	Catalog Item	Process Engine		Progress	configuration under verification
BG-003	QR Code loading delay	Submit booking	Low	Closed	Optimized QR generation

Notes

- All core functionalities were tested successfully.
- Fare calculation and booking record creation work correctly.
- Metro station data is stored in custom tables.
- QR-code-based ticket generation is integrated into the booking workflow.
- Minor configuration issues were identified and resolved during testing.
- The application is ready for demonstration after final automation configuration.
